

Build Your Own Advanced Terminal!

The Comter II is easily the most advanced computer terminal kit on the market. It has its own internal memory of 256 characters which combines with a highly-readable, soft orange 32 character display to provide ease of operation and information retrieval.

Complete cursor control allows you to move data in and out of the display and operate the Comter II with the versatility of a CRT terminal. **Built-in audio-cassette interface allows you to store unlimited data from the computer and feed that information back into the computer.**

Other features include auto transmit which allows line-by-line transmission of data or program information to the computer from the Comter's memory. The Comter II has a *complete ASCII encoded keyboard* with TTY-33 format plus the addition of special function keys. Its total weight is just 15 lbs.

Flexible power requirements allow you to operate the computer at either 95-125V or 190-250V. The Comter II can be interfaced to any computer with an RS232 serial interface. Requires an SIOA board to be connected to the Altair 8800. No interface required to connect to the Altair 680.
