

## Carlingswitch offers custom quality at catalog prices.

Solving your design problems with quality "standard" and "custom" switching devices is our specialty. We continually lead the industry with new product innovations which

incorporate modern materials, innovative styling, patented and patent pending switching mechanisms—all at competitive catalog prices.

### Miniature Rocker/Paddle Switches

All-nylon miniature rocker and paddle switches offer high reliability, low cost, snap-in mounting, multiple circuit choices, plus ratings for power switching or low level dry circuit switching applications. These attractive switches are available in a wide variety of standard and custom-matched colors. They feature our patented self-cleaning wiping action contacts and are designed to meet European standards.

### Magnetic Circuit Breakers

Industry-standard magnetic circuit breakers are available in one, or two and three-pole configurations with single or multiple actuators. Rated from .100A to 30.0A @ 277VAC and 65VDC (max). Instantaneous, ultra short, short, medium and long time delays; switch only, series, shunt or relay trip circuits. Special color caps available in eight attractive colors. Well-suited for new designs or as direct replacements for competitive protectors.

### Miniature Toggle Switches

New low cost highly reliable miniature toggle switches with patented self-cleaning wiping action contacts are designed to meet European standards. These attractive switches are well suited for power switching or low level dry circuit switching applications. Available assembled or partially assembled (switch body and snap-in actuator separate); user can "mix or match" in-house with a wide array of actuator and circuit options.

### Rotary Switches

Quality compact switches provide up to eight switching positions. They're rated at 6 amp 125VAC and 3 amp 250VAC. Combination solder lug and quick connect terminal. Other versions available with AC or DC ratings.

### Full Size Tippette® Rocker Switches

Tippette rocker switches are available in an almost endless variety of circuits, current ratings, actuator and bezel styles, mounting brackets and termination types. Other options include legend imprinting, standard or custom-matched bezel and actuator colors. Plus, our patented "Drip Dry" option is an inexpensive way of protecting switch from dirt, moisture and other contaminants. Lighted versions feature single or multiple indicator lights—available with voltages from 6VDC to 240VAC.

### Slide Switches

Low cost high quality slide switches feature a variety of circuits, contact ratings and terminations. Universal applications range from hair dryers to motion picture projectors.

### Mini Tippette Switches

All-nylon low cost insulated switches are tested at full load for 100,000+ cycles. Single or double pole versions offered. All feature convenient snap-in mounting, paddle or rocker actuation. Choose from various current ratings, circuit designs, termination types, colors (standard or custom matches) and legend imprinting. Lighted versions with lamp voltages from 6VDC to 240VAC.

### Full Size Toggle Switches

These toggle switches are available in one through four poles in ratings up to 20 amps. Single and double pole switches are available with a variety of circuit, termination and actuator variations including an insulated all-nylon model. New lighted versions utilize a translucent actuator which displays two colors to indicate switch positions. Add a neoprene bushing seal that protects against dust and moisture and you have the right switch combination for marine and automotive applications.

### Push Button Switches

Quality push button switches offer a variety of sizes, contact ratings and terminations for most applications. Choose momentary action for testing or sustained action for vacuum cleaners and other appliance applications.

### Catalogs of Value

Complete specifications for literally thousands of switching devices are yours free in our new Full Line and Magnetic Circuit Breaker Catalogs. They're both available from your nearest Carlingswitch Representative or Distributor. Or write us at the address below.
