

Cost efficiency You can put your finger on... **CORTRON®** **SOLID STATE KEYBOARDS**

Get your hands on a CORTRON Solid State Keyboard, and you'll soon find out why you can't judge all keyboards on initial price alone.

It's after installation that cost efficiency becomes most important. In life expectancy, ability to endure extreme environments, high speed operation without "misses," accuracy, downtime caused by beverage spillages, reliability, serviceability and human engineered features. That's where a CORTRON Solid State Keyboard really pays off.

Unique contactless key switch makes the difference. Utilizing ferrite core switching technology, the CORTRON Key Switch is mechanically simple (only 4 basic parts!) and has an ultra reliable 100 million cycle life test rating. CORTRON Keyboard Professionals can translate what this can mean to you in cost efficiency terms of MTBF (mean time before

failure). CORTRON has actual customer experience of MTBF in excess of 40,000 hours.

They'll also explain other advantages you'll gain over competitive technologies such as Hall effect, reed switch, and capacitive switching. All in all, you'll find the CORTRON Key Switch offers unusual built-in protection against costly service calls and the hardship of downtime.

"Human engineered" keytops and key placement options give CORTRON low profile alpha numeric keyboards the familiar "type-writer feel" that promotes operator productivity and efficiency.

Nothing left to chance. CORTRON solid state keyboard materials, components, sub-assemblies, and final assembly are 100% inspected and tested to assure your specifications are met with plenty of room to spare.

These are just a few of the cost efficiency benefits CORTRON offers you and your customers.

Cost efficiency you can put your finger on.
