

More cost effective, reliable and simple.

Our human-engineered Golden Touch® capacitive keyboard will lower the life-cycle cost of your product. The patented hinged moving plate provides unsurpassed reliability and extra-long life. There is no metallized sponge to deteriorate and soak up moisture. Finally, you shouldn't pay for options that are standard on the Golden Touch®.

- Flexible microprocessor-based design
- Customized software
- No keyswitch bounce
- Two-year warranty
- 250,000,000 MCBF

- Patented, tease-proof switch detection circuit
- High RFI/EMI/ESD tolerance
- Single-piece, unitized frame
- Molded inserts
- Impervious to moisture, dust, debris
- Standard or custom frames available
- Smooth, crisp, linear feel
- Variety of stepped, sloped or sculptured keytops
- Automated, integrated, quality-proven manufacturing

For information on the ways our Golden Touch® can lower your product's life-cycle cost, attach your business card or company letterhead to this ad and mail it to:
