

Great Tactile Feel

Our KL MINIKEY™ low profile keyboard gives you the stroke and tactile response of a full-size keyboard, in a clean, compact design.

Fast, positive contact closure and tactile feel are assured with our designed-in "over-center" mechanism—you won't find any artificially induced feel in a Minikey.

And our low profile is really low. Keytops extend only .070" (1.78 mm) above the face of the keyboard. Total keyboard depth, including keys, is less than .312" (7.92 mm). Great for space-saving! Great for appearance!

Minikeys are available with 12- or 16-key arrays, rear or front mounts, and a variety of output codes. They can interface with all digital logic circuitry, including TTL and CMOS, and can be used for TOUCH TONE™ operation.

Prices range from \$5.10 to \$6.50, in quantities of 100. For further information, phone toll-free 800-528-6050 (in Arizona, 800-352-0452) Ext. 924, for the name and address of your nearest Digitran technical representative or distributor.

Or contact us directly.
