APPLICATIONS

NUMERIC KEYBOARDS—
TOUCH TONE OR CALCULATOR

DATA ENTRY TERMINALS
LOW PROFILE KEYS
WITH "SCULPTURED KEYTOPS"

POINT-OF-SALE

INTELLIGENT TERMINAL—
SOLID STATE KEYBOARD

WORD PROCESSOR

TELEPRINTER WITH
KATA KANA LEGENDS

KEY TRONIC LOW PROFILE KEYBOARD

Key Tronic Corporation, a world leader in custom keyboard manufacturing, now offers a low-profile solid-state keyboard design that is both cost competitive and reliable. To adequately accommodate this new design, Key Tronic has made available the World's largest 2-shot legend library with an almost unlimited choice of keytop colors.

Key Tronic's design is unique in that the new low profile keyboard utilizes no solder connections between the printed circuit board and the keyswitch assembly. Keyswitches can actually be added or deleted with ease at a later date to accommodate the specialized growth requirements or modifications of a customer's needs. Additionally, the new low profile incorporates an easily removable frame that serves as a debris/liquid guard and static discharge shield. Two-Key or N-Key Rollover is a feature that is now offered at no additional cost. Aside from the revolutionary keyboard updates, the Key Tronic Low Profile Keyboard is the quietest keyboard on the market today.

3 TECHNOLOGIES TO CHOOSE FROM

"LOW PROFILE SOLID-STATE KEYBOARD"

- LOW COST
- RIGID FRAME MOUNTING
- SOLID STATE RELIABILITY
- LSI OR TTL ENCODING
- WORLD'S LARGEST 2-SHOT LIBRARY
- STANDARD WITH TWO-KEY OR N-KEY ROLLOVER

"STANDARD SOLID STATE KEYBOARD"

- LOWEST COST PCB MOUNTING
- SOLID STATE RELIABILITY
- LSI OR TTL ENCODING
- "SUPER QUIET OPTION"
- STANDARD WITH TWO-KEY OR N-KEY ROLLOVER
- OVER 12,000 TOOLED LEGENDS

"REED SWITCH"

- 8 YEARS PROVEN QUALITY PRODUCTION
- 5 YEAR KEYSWITCH WARRANTY
- HERMETICALLY SEALED CONTACTS—IDEAL IN RUGGED ENVIRONMENT AND MILITARY APPLICATIONS
- HIGH QUALITY REED CONTACTS—IDEAL FOR MICRO PROCESSOR APPLICATIONS
- LONG LIFE—OVER 100 MILLION CYCLES
- OVER 12,000 TOOLED LEGENDS
