

**This Design Engineer
just saved his company \$10,000
by choosing a cheaper keyboard.**

**Now, he
almost has
enough saved
to pay for the
headaches.**

Buying a cheaper keyboard will not provide the most cost effective solution for your needs. There are no quick, easy substitutions for longevity. At Key Tronic, we are both quality and cost conscious. We offer low cost, capacitive keyboards which are designed to interface with any system in the most efficient manner. High-quality, solid state keyboards cost as low as \$40 in high volumes. So before you choose the up-front, seemingly simplest, and lowest cost solution, talk to us. Look at both sides of the coin now. Otherwise, you may be attacked from all sides later!
