

The foremost solution
to high volume, custom-design switch panels...

Monopanel Touch Switches from CENTRALAB

Designers of switch panels for today's newest products — from appliances to instrumentation — are turning to Monopanel touch switches for custom designs that incorporate all the circuitry, switching function and graphics they require. Centralab, the industry's most complete touch switch facility, offers a choice of film-base or rigid panels.

Recognized for over 50 years as experts in switch technology, Centralab is a singular source of help for custom switch graphics and quality, high volume switch production capabilities. Monopanel is the answer to your high density switching needs. Batch processing enables us to economically produce as many as 743 switches on a master panel that's only 11" x 17". Monopanel is a complete switch package that's thin, light, durable and 100% tested. More than 10 million failure-free switching cycles attest to its long operational life.

Add the touch of innovation to your product. Call your Centralab Representative for a demonstration, application help or information on prototyping panels, or write Centralab Electronics, Division Globe-Union Inc., 5757 North Green Bay Avenue, R.O. Box 591, Milwaukee, Wisconsin 53201.
