

The snap action switch

...for **POSITIVE** switching in low energy circuits

Now your 4 to 100 milliampere, 4 to 30 volt circuits can have the same high reliability you've learned to love in Cherry snap action switches. Because, our "heart of gold" snap action switches have the same long life coil spring mechanism, the same large overtravel as all of our snap action switches.

They also have gold crosspoint contacts. A configuration with knife-edge contact area so small (9 millionths of a square inch)... with contact force so great (about 5,000 psi)... and gold alloy so pure and film-free... you are absolutely assured of positive contact every time. For 50 million operations and beyond.

Cherry Gold Crosspoint Contact Switches are available in virtually every snap action design in

Cherry's big catalog. And you *know* what a wide variety of switch types, sizes and mounts *that* is. Choose any switch design from a basic open or general purpose to a panel mount pushbutton, low torque, miniature, subminiature or subminiature module. Chances are 99 to 1 that the switch you have chosen is available with gold crosspoint contacts. Which will make designing low energy circuits a whole lot easier... and a whole lot better. (No love letters, please.)

For free test sample and complete catalog, just TWX 910-235-1572... or PHONE 312-689-7700.

CHERRY

Cherry switches now available locally from distributors.
