

Three SHINING examples of CHERRY ingenuity

New: Lighted Thumbwheel and Push-wheel switches that do more than just put a little light on the subject.

Thumb a wheel or push a button. Either way you get incandescent lighted readout...plus electrical output in your choice of dozens of codes...plus your choice of sizes that should (and will!) fit your every application. What sizes? Take your pick:

T75 standard size thumbwheel. Front mount design with from 2 to 16 positions. Measures 1.300" high with .394" wide modules.

T20 miniature size thumbwheel. It's a back mount design, comes in from 2 to 16 positions and measures just 1.150" high with .500" wide modules.

T56 sub-miniature pushwheel rotary switch. Wheel indexing is controlled by two plungers—one above (–) and one below (+) the lighted legend to control up/down counting. Front mount, requires no hardware to gang. Just snap into panel cutout. Measures a small .945" high with .300" wide modules.

Next time you need a light, turn it on with a Cherry thumbwheel or pushwheel

switch. If you don't need light, ask Cherry, too. We'll tell you about our unlighted thumbwheels...leverwheels...and pushwheels in sizes from industrial to sub-sub-miniature. With your choice of mountings, terminations, colors, finishes and legends. In dustproof versions, pre-assembled gangs and more.
