

Just a flutter of  
pressure...

...and snap

Less than 2 grams of force actuates this Cherry snap-action miniature switch. Outside, a  $2\frac{3}{8}$ " long aluminum lever provides unusually low operating force. Inside, an extra internal actuator reduces operating force even more while maintaining solid contact pressure for reliable performance.

Our unique light force miniature design is available with other external levers offering operating forces ranging from 3.5 to 15 grams...rated 3 amps, 125VAC. Gold crosspoint contact versions bring this same, dependable switching to your low energy (0.1 amp) solid state circuits. Or, choose higher electrical ratings of 5, 10 or 15 amps with increased...but still low...operating forces.

**EXTRA INTERNAL ACTUATOR**  
reduces force required at button plunger while  
maintaining solid contact pressure.
