

Illuminated single-pole rockers come in red, green, amber, white or clear. Hot-stamped legends available.

Flush-mounted switches snap in and stay in. Available in a wide range of designer colors and styles. Choose from bright nickel-plated metal or all-plastic bezel, 1 or 2 pole.

Locking rocker switches. Supplied with a unique removable "key" to prevent inadvertent or unauthorized operation.

We've added a new look to our rocker line—"see thru"

One of the industry's biggest selections of reliable snap-ins just got bigger. We've added new mechanical indicator switches to our already broad Rockette® line. Look over our full lineup. It includes sub-panel mounting, as well as a wide variety of termination types and circuit configurations. Then look up your Cutler-Hammer Sales Office or Switch Distributor.

NEW rockers with mechanical indicators show functions thru a "window" on the actuator. Available non-illuminated or illuminated and can be customized with words or colors. Choose from bright nickel-plated metal or all-plastic bezel.
