

Longer Life Greater Reliability

Digitran's new touch sensitive keyboard is the most reliable keyboard ever designed.

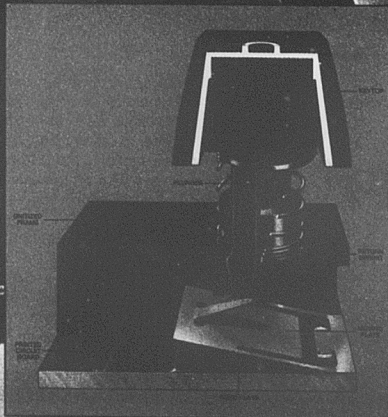

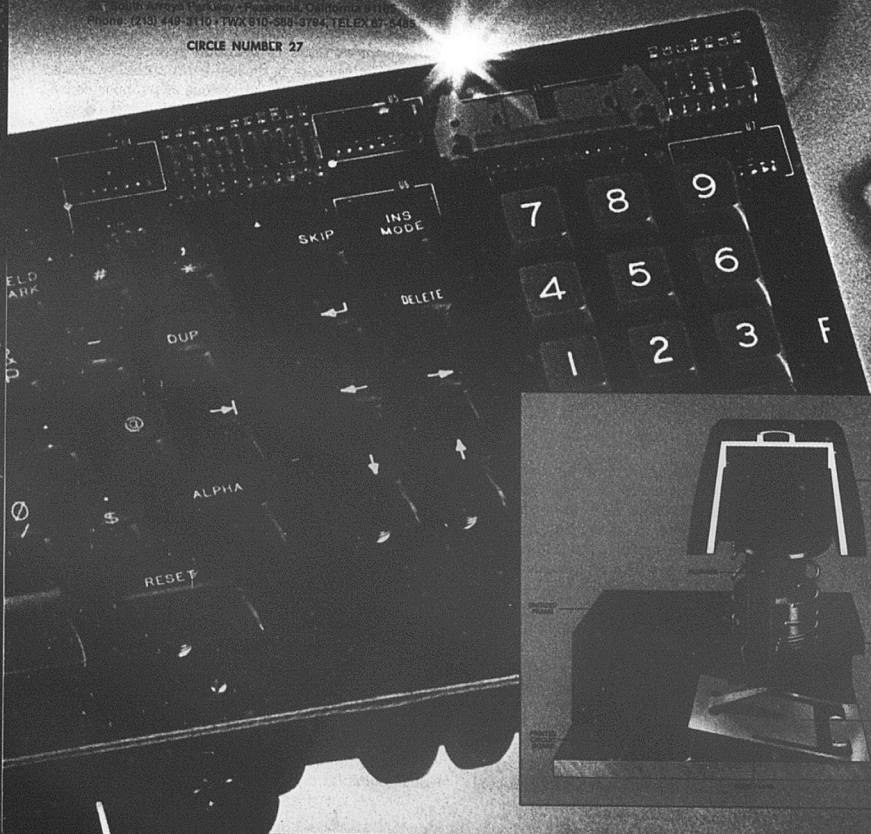

It's built with a solid state electronic circuit that has no moving parts. It's built to the highest standards and this makes our keyswitches more reliable than any other keyswitch. It's built with a solid state electronic circuit that has no moving parts. It's built to the highest standards and this makes our keyswitches more reliable than any other keyswitch.
