

Design your own push-button switches and standards your way...

Make display specification easier with Electro-Mech's Design-Pak™.

Almost every lighted push-button switch display will require some special electrical or mechanical function to make a control panel provide what is needed within a given space. The ability to answer this need, and at a cost you can afford, is what Electro-Mech's DESIGN-PAK™ is all about.

DESIGN-PAK™ features a unique group of design options including Sub-Panel mounting frames, display panels with switches, multiple interlock/lockout switching functions, simultaneous electrical/mechanical actuator systems, and hundreds of multi-image/lens display options. In fact, the displays you see here are examples of applications where a standard wouldn't do, but a custom design wasn't affordable — yet the designers found the answers — quickly and cost-effectively.

You can draw upon a complete line of standard, quality-designed LPB's and indicators to meet your exact design requirement. It's easy. There's no sacrifice of Electro-Mech's quality either; Low-Bounce, long-life contacts, and modular design in momentary, alternate action, or unique interlocking styles.

A complete selection of designs

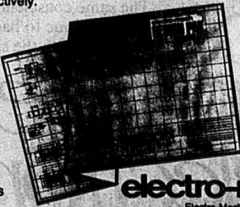

Hundreds of packaging/performance options may be combined with these fine quality specifications to give you the functions and appearance you want.

Typical electrical specifications—

RATING: From 30 volts DC or 115 volts AC, 2A resistive, 1A inductive.
SWITCHING FUNCTIONS: from single indicator light to 1PST and 6PDT, N.O. or N.C., momentary or alternate.
BULB: T-1 1/4 Midget flange base.

Typical mechanical specification—

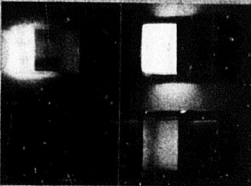

NOMINAL PUSH-BUTTON CONFIGURATION: square, round, rectangular, from 1/2". Flat, opaque sides, or contoured keyboard.

OPERATING PRESSURE: from 9 oz. (momentary) to 2 lbs. + 1 lb. (alternate nominal).
PLUNGER TRAVEL: from 1/8" to 3/16" (approx.).
ACTUATIONS: 100,000 minimum.
These are only a few of the many performance characteristics available to meet your exacting need.

Receive your own DESIGN-PAK™

It's FREE! Your DESIGN-PAK™ includes a complete catalog of standard ELECTRO-MECH switches, indicators and accessories for display design plus a supply of Design-Pak™ Engineering Vellums that will make your special switch requirements easier — our response to you fast, accurate and economical!

Call or write today for your DESIGN-PAK™. Or contact your nearest ELECTRO-MECH Representative. You can design your own lighted push-button displays and standards your way.
