

To make a complete line of pushbutton controls, you need more than pushbuttons.

Pushbuttons from MICRO SWITCH's AML (Advanced Manual Line) have always been attractive to designers. Because they look so good.

And because they're so easy to mount and wire.

But now, the AML series is even more appealing. Because now there's a variety of rocker and paddle switches to choose from, including dual lamp and dual color. Which means now you can perform just about any function with a harmonious display. You don't have to compromise.

AML controls also look appealing to the people who have to do the wiring. All are designed with the same depth for single level termination, regardless of switch or terminal type.

There's easy snap-in mounting from the front, PC board mounting or sub-panel mounting using individual, strip or matrix hardware.

Which means mounting is simpler. Wiring is simpler. Engineering time is reduced. And total installed cost is lower.

Plus, they offer solid state, electronic control or power switching in the same size housing. All AML devices are designed to meet international, UL and CSA standards.

Displays include split screen, hidden color, and a unique three-segment lens cap indicator. The choice of lamps includes T-1 $\frac{3}{4}$ wedge base, neon and LED.

AML has it all — pushbuttons, indicators, and now, paddles and

rockers. But to see how good-looking AML really is, contact us for a personal demonstration.

MICRO SWITCH will provide you with field engineers for application assistance and a network of authorized distributors for local availability. Write us for details or call 815/235-6600.

MICRO SWITCH products are available worldwide through Honeywell International.
