

MICRO SWITCH products are available worldwide through Honeywell International.

We're big in limit and enclosed switches.

Think MICRO SWITCH when you're in the market for limit and enclosed switches.

Because we offer the world's biggest selection to satisfy your every need. With most available right off the distributor's shelf.

WHEN SEVERAL HEADS ARE BETTER THAN ONE.

Heavy Duty LS limit switches offer a choice of heads and actuators. Twenty-seven, to be exact. So one's sure to get your application going. And since the LS is sealed against virtually all oil, water and dirt, nothing's going to stop it.

Multi-plunger ZD limits are for limited spaces. They offer up to eight contact blocks in a sealed housing. Each with its own operating plunger.

WHEN THINGS GET STICKY.

Wet or dusty jobs call for an enclosed switch. The "F" type, sealed against most oils and contaminants, uses SPDT circuitry and has a 20 amp, 480V A.C. capacity inside a rugged diecast housing. BZG/BZH switches consist of a snap-action SPDT basic within a NEMA 1 and 4 enclosure. Environmentally-sealed CE miniatures switch with a reliable SM basic.

WHEN THINGS MIGHT BLOW-UP.

The EX is the smallest in our line of compact, high-capacity switches in explosion-proof housings. It offers up to 20 amp capacity and is both UL and CSA listed.

Your MICRO SWITCH Authorized Distributor (Yellow Pages, "Switches, Electric") has most of these switches in stock. Plus a lot more. So stop in and see him. Or, for more information, contact your MICRO SWITCH Branch Office or write to us direct.

MICRO SWITCH makes your ideas work.
