

We're big

MICRO SWITCH products are available worldwide through Honeywell International.

in pushbuttons.

Think MICRO SWITCH when you're in the market for pushbuttons.

Because we offer one of the biggest selections in the industry... literally thousands of pushbuttons. With many available right off the distributor's shelf.

OUR NEW LOOK.

Two new pushbuttons are good examples of our commitment to total capability in lighted switches.

The Series 4 is one of the least expensive lighted pushbuttons in existence. While the Series SN, our solid state pushbutton, is ideal for use where direct control of solid state circuitry is desired.

OTHER BRIGHT EXAMPLES.

The Series 2 is a versatile lighted switch featuring up to a four section display screen. The Series DS meets Mil/Spec requirements and can be individually or matrix mounted. The miniature Series 3 is available for low energy or power switch applications. The Series 50PB offers bushing mounting, as well as a choice of button sizes, shapes and colors.

WHEN LIGHTS AREN'T NECESSARY.

Our lineup of unlighted switches is just as broad. The new Series 8 includes colored buttons in two sizes. The Series

DM is an inexpensive snap-action switch with long life. (Also available lighted.) For versatility, there's the Series 6 and the Series

PB with a variety of circuitry and load handling options. Both use subminiature "SM" basics for switching.

There are plenty more. And your MICRO SWITCH Branch Office or Authorized Distributor (Yellow Pages, "Switches, Electric") can show you how to use them to custom design your panel without resorting to custom switches. Call them or write to us direct.

MICRO SWITCH makes your ideas work.
