

Free. A switch we don't even make.

You'll be using it every time you pick up your telephone to call us with a switch problem.

We may not make this one, but we make millions of push button, rocker, toggle,

slide, strip, illuminated, pc-board mounted and miniature switches. And if one of them won't do the job, we can custom design the switch you need.

We're so sure UID has the right switch at the right price, we'll pay for the call. Now that's a switch. (Our number is **800 327-3814**. Just ask for Ely Silk.)
