the first thing
pushbutton controls
indicate is the
quality of your product

In a world where first impressions mean so much, why settle for aesthetically (and functionally) inferior pushbutton switches, when you can choose EAO pushbutton controls at competitive prices? EAO holds the line on price, AND quality. With EAO on your panel you don't have to accept second-class appearance or performance... hot spots, fuzzy legends, tiny-looking bezels, uncoordinated configurations and sizes and faulty human engineering. EAO controls enhance your product.

And EAO gives you complete design freedom. You can select mechanical or electrical switches... combine up to 8 lens colors with bezels in rectangular, round, square or dual

rectangular shapes... choose switch and contact combinations from 1 to 4 poles momentary or alternating action... even harmonize the full range of lighted and non-lighted pushbutton controls with compatible key lock designs.

Available contact arrangements and contact materials have ratings from low-level to 10A @ 250 VAC. No matter how complex or wide-range your needs, EAO Status Symbols allow you to single-source all requirements.
