

UNIMAX: BETTER SWITCHING SOLUTIONS

Lighted Pushbutton Switches

Ask for Catalog LPB

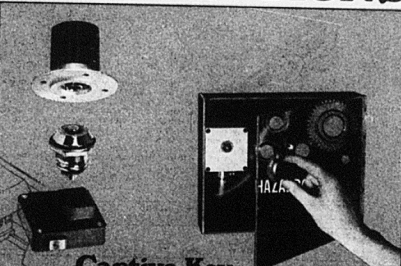

In a field full of appearance quality/performance switching variables, Unimax switches are the ones that show you care about quality, performance and price.

• **Single Lamp**—Round, square or rectangular, lighted and unlighted, momentary or alternate switching, 1-4 poles.

• **Dual Lamp**—Rectangular and square, double pole, momentary or alternate action. 5A @ 250VAC or 28 VDC. Keylock versions.

• **Four Lamp**—Multi-switch configurations. Approved to MIL-S-22885/9-12. Also meets high-shock requirements of MIL-S-910C.

• **Oil-Tight**—Pilot, lighted, unlighted, emergency, key-operated rotary types. 500V @ 10A ratings.

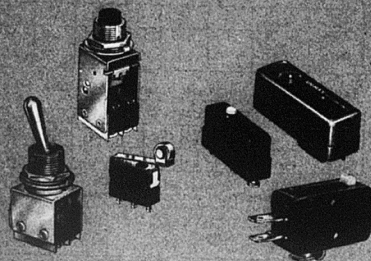

Captive Key Safety Interlock Systems

Current and expanding OSHA regulations attempt to limit mans disregard for his own and others safety. The Unimax "GW" line of "Captive Key" Interlocks and Safety Switches enables designers and users of hazardous machines to comply with the most stringent guard interlocking requirements.

The "GW" system combines, in an integral unit, fail-safe electrical switching with a tamper-proof mechanical locking mechanism which positively prevents the release of a guard until the machine is securely isolated. Ask for Catalog 70.

The industry's widest selection of precision, general purpose, miniature and sub-miniature snap-action switches, as well as toggle and push-button switch assemblies. Ratings from low-level to 25A. All actuator styles available. Ask for catalog 60.

Snap-Action Switches

A full range of snap-acting switches enclosed in rugged die cast metal housings for protection against mechanical damage and depending on the method of sealing, against destructive environmental conditions. Series KS (compact) is available with either through bolt or flange mounting. Series KB (heavy duty) is horsepower rated. Series KWL (splash proof) and KXL (explosion proof) are suitable for use in hazardous environments. All types are available with a variety of actuators. Ask for Catalog 30.
