They are designed for use in a wide variety of applications. They are available in 12 different styles and sizes. They are designed for use in a wide variety of applications.

NO-HITCH LPBs

Unimax's Lighted Pushbutton Switches are available in 12 different styles and sizes. They are designed for use in a wide variety of applications. They are available in 12 different styles and sizes. They are designed for use in a wide variety of applications.

NO-HITCH Thumbwheels

No interconnecting hardware needed—modules just snap together. Choose our unique new S2D, only .709" high, capable of both front and rear panel mounting... or our Series S standard thumbwheels. Both types are only .9315" wide. And our standard S line even offers a selection of "SmartSwitches" with the added capability of integrated logic functions built right in.

We've eliminated every hitch in finding the right switch. And to avoid your subsequent production hitches, all Unimax switches share something in common: uniform, quality construction; switch after switch after switch. Send for latest literature: Unimax Switch, 3500 Road, Wallingford CT 06492, or call (203) 261-6701.
